**DETAILED ACTION**

***Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-19 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 20-45 of copending Application No. 12/932084. Although the conflicting claims are not identical, they are not patentably distinct from each other because the only difference between the application claims 1-19 and copending claims 20-45 lies in the fact that the copending claims include more elements and are thus more specific. Thus the invention of claims 20-45 of the copending application is in effect a "species" of the "generic" invention of the application claims 1-19. It has been held that the generic invention is "anticipated" by the "species" See *In re Goodman*, 29 USPQ2d 2010 (Fed. Cir. 1993), Since the application claims 1-19 are anticipated by claims 20-45 of the copending application, they are not patentably distinct from copending claims 20-45.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 2 recite the limitation "a member, which is to be part of the reinforcing member" in lines 21 and 26, respectively. This limitation is vague and indefinite because it is not clear how the member is structurally related to the reinforcing member. It is not clear whether the member is a distinct part of the reinforcing member, or whether it is merely a second recitation of the reinforcing member itself. In the case that the member is a distinct part of the reinforcing member, the structural relationship between the member and the reinforcing member should be defined in the claims. In the case that the member is not a distinct part of the reinforcing member, a member should not be recited separately from the reinforcing member, but rather any structural limitations should be recited in relation to the reinforcing member itself.

Claim 17 recites the limitation "a third curved surface" in line 3. There is insufficient antecedent basis for this limitation in the claim, as there are no previously recited first or second curved surfaces.

Claim 18 recites the limitation "a fourth curved surface" in line 2. There is insufficient antecedent basis for this limitation in the claim, as there are no previously recited first, second, or third curved surfaces.

#### ***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
